

Dear Teacher,

What is a Foldable?

A Foldable is a 3-D, student-made, interactive graphic organizer based upon a skill. Making a Foldable gives students a fast, kinesthetic activity that helps them organize and retain information. Every chapter in the student edition of the textbook begins with a Foldable that is used as a Study Organizer. Each chapter's Foldable is designed to be used as a study guide for the main ideas and key points presented in sections of the chapter. Foldables can also be used for a more in-depth investigation of a concept, idea, opinion, event, or a person or place studied in a chapter. The purpose of this ancillary is to show you how to create various types of Foldables and provide chapter-specific Foldables examples. With this information, you can individualize Foldables to meet your curriculum needs.

This book is divided into two sections. The first section presents step-by-step instructions, illustrations, and photographs of 34 Foldables, many of which were not used in the student edition. I've included over 100 photographs to help you visualize ways in which they might enhance instruction. The second section presents two extra ideas on how to use Foldables for each chapter in the textbook. You can use the instruction section to design your own Foldables or alter the Foldables presented in each chapter as well. I highly suggest making this book available as a source for students who wish to learn new and creative ways in which to make study guides, present projects, or do extra credit work.

Who Am I?

You may have seen Foldables featured in this book used in supplemental programs or staff-development workshops. Today my Foldables are used internationally. I present workshops and keynotes to over fifty thousand teachers and parents a year, sharing Foldables that I began inventing, designing, and adapting over thirty five years ago. Students of all ages are using them for daily work, note-taking activities, student-directed projects, forms of alternative assessment, journals, graphs, tables, and more.

Have fun using and adapting Foldables,

A handwritten signature in black ink, reading "Dinah Zike". The signature is fluid and cursive, with the first name "Dinah" and last name "Zike" clearly distinguishable.

Why use Foldables in Social Studies?

When teachers ask me why they should take time to use the Foldables featured in this book, I explain that they:

- . . . organize, display, and arrange information, making it easier for students to grasp social studies concepts, theories, facts, opinions, questions, research, and ideas.
- . . . are student-made study guides that are compiled as students listen for main ideas, read for main ideas, or conduct research.
- . . . provide a multitude of creative formats in which students can present projects, research, interviews, and inquiry-based reports.
- . . . replace teacher-generated writing or photocopied sheets with student-generated print.
- . . . incorporate the use of such skills as comparing and contrasting, recognizing cause and effect, and finding similarities and differences.
- . . . continue to “immerse” students in previously learned vocabulary, concepts, information, generalizations, ideas, and theories, providing them with a strong foundation that they can build upon with new observations, concepts, and knowledge.
- . . . can be used by students or teachers to easily communicate data through graphs, tables, charts, models, and diagrams, including Venn diagrams.
- . . . allow students to make their own journals for recording observations, research information, primary and secondary source data, surveys, and so on.
- . . . can be used as alternative assessment tools by teachers to evaluate student progress or by students to evaluate their own progress.
- . . . integrate language arts, the sciences, and mathematics into the study of social studies.
- . . . provide a sense of student ownership or investiture in the social studies curriculum.

Foldables and the NCSS Thematic Strands

In *Curriculum Standards for Social Studies: Expectations of Excellence*, the National Council for the Social Studies (NCSS) identified 10 themes that serve as organizing strands for the social studies curriculum at every school level. The themes include:

- I. Culture
- II. Time, Continuity, and Change
- III. People, Places, and Environments
- IV. Individual Development and Identity
- V. Individuals, Groups, and Institutions
- VI. Power, Authority, and Governance
- VII. Production, Distribution, and Consumption
- VIII. Science, Technology, and Society
- IX. Global Connections
- X. Civic Ideals and Practices

Students are expected to master specific skills that are organized around these themes, such as analyzing data, comparing and contrasting similarities and differences, explaining and describing concepts, and identifying cause-and-effect relationships.

Foldables help students practice and master these specific skills. Foldables require students to identify and describe main ideas, relationships, and processes. In most cases, students need to understand and comprehend information before they can illustrate it in a foldable. Foldables help students think, analyze, and communicate.

Foldable Basics

What to Write and Where

Teach students to write general information such as titles, vocabulary words, concepts, questions, main ideas, and dates on the front tabs of their Foldables. This way students can easily recognize main ideas and important concepts. Foldables help students focus on and remember key points without being distracted by other print.

Ask students to write specific information such as supporting ideas, student thoughts, answers to questions, research information, class notes, observations, and definitions under the tabs.

As you teach, demonstrate different ways in which Foldables can be used. Soon you will find that students make their own Foldables and use them independently for study guides and projects.

With or Without Tabs

Foldables with flaps or tabs create study guides that students can use to check what they know about the general information on the front of tabs. Use Foldables without tabs for assessment purposes or projects where information is presented for others to view quickly.

Venn diagram used as a study guide

Venn diagram used for assessment

What to Do With Scissors and Glue

If it is difficult for your students to keep glue and scissors at their desks, set up a small table in the classroom and provide several containers of glue, numerous pairs of scissors (sometimes tied to the table), containers of crayons and colored pencils, a stapler, clear tape, and anything else you think students might need to make their Foldables.

Storing Foldables

There are several ways that students can store their Foldables. They can use grocery bags, plastic bags, or shoeboxes. Students can also punch holes in their Foldables and place them in a three-ring binder. Suggest they place strips of two-inch clear tape along one side and punch three holes through the taped edge.

By keeping all of their Foldables together and organized, students will have created their own portfolio.

HINT: *I found it more convenient to keep student portfolios in my classroom so student work was always available when needed. Giant detergent boxes make good storage containers for portfolios.*

Use This Book as a Creative Resource

Have this book readily available for students to use as an idea reference for projects, discussions, social studies debates, extra credit work, cooperative learning group presentations, and so on. Encourage students to think of their own versions of Foldables to help them learn the material the best way possible.

Basic Foldables Shapes

The following figures illustrate the basic folds that are referred to throughout the instruction section of this book.

Taco Fold

Hamburger Fold

Hot Dog Fold

Burrito Fold

Shutter Fold

Valley Fold

Mountain Fold

Half Book

Fold a sheet of paper in half.

1. This book can be folded vertically like a *hot dog* or . . .
2. . . . it can be folded horizontally like a *hamburger*.

Use this book for descriptive, expository, persuasive, or narrative writing, as well as graphs, diagrams, or charts.

Folded Book

1. Make a *half-book*. (p. 14)
2. Fold it in half again like a *hamburger*. This makes a ready-made cover and two small pages for information on the inside.

Use photocopied work sheets, Internet printouts, and student-drawn diagrams or maps to make this book. One sheet of paper becomes two activities and two grades.

When folded, the worksheet becomes a book for recording notes and questions.

Three-Quarter Book

1. Make a *two-tab book* (p. 18) and raise the left-hand tab.
2. Cut the tab off at the top fold line.
3. A larger book of information can be made by gluing several *three-quarter books* side by side.

Sketch or glue a graphic to the left, write one or more questions on the right, and record answers and information under the right tab.

1

2

Example of several books glued side by side.

Bound Book

1. Take two sheets of paper and fold them separately like a *hamburger*. Place the papers on top of each other, leaving one-sixteenth of an inch between the *mountain tops*.
2. Mark both folds one inch from the outer edges.
3. On one of the folded sheets, cut slits in the middle to the marked spot on both sides.
4. On the second folded sheet, start at one of the marked spots and cut the fold between the two marks.
5. Take the cut sheet from step 3 and fold it like a *burrito*. Place the *burrito* through the other sheet and then open the *burrito*. Fold the bound pages in half to form an eight-page book.

Use for qualitative and quantitative observation journals. Make large project books using 11" × 17" paper.

Two-Tab Book

1. Make a *folded book* (p. 15) and cut up the *valley* of the inside fold toward the *mountain top*. This cut forms two large tabs that can be used for text and illustrations on the front and back.
2. The book can be expanded by making several of these folds and gluing them side by side.

Use this book for learning about two things. For example, use it for comparing and contrasting, determining cause and effect, finding similarities and differences, using Venn diagrams, and so on.

Pocket Book

1. Fold a sheet of paper in half like a *hamburger*.
2. Open the folded paper and fold one of the long sides up two inches to form a pocket. Refold along the *hamburger* fold so that the newly formed pockets are on the inside.
3. Glue the outer edges of the two-inch fold with a small amount of glue.
4. **Optional:** Glue a cover around the *pocket book*.

Variation: Make a multi-paged booklet by gluing several pockets side by side. Glue a cover around the multi-paged *pocket book*.

Summarize information on note cards or on quarter sheets of notebook paper. Store other foldables, such as *two-tab books*, inside the pockets.

Matchbook

1. Fold a sheet of paper like a *hamburger*, but fold it so that one side is one inch longer than the other side.
2. Fold the one-inch tab over the short side forming a fold like an envelope.
3. Cut the front flap in half toward the *mountain top* to create two flaps.

Use this book to report on one thing, such as a person, place, or thing, or for reporting on two things, such as the cause and effect of Western Expansion.

Shutter Fold

1. Begin as if you were going to make a *hamburger* but instead of creasing the paper, pinch it to show the midpoint.
2. Fold the outer edges of the paper to meet at the pinch, or mid-point, forming a *shutter fold*.

Use this book for comparing two things. Students could also make this foldable with 11" × 17" paper and then glue smaller books—such as the *half book*, *journal*, and *two-tab book*—inside to create a large project full of student work.

1

2

Trifold Book

1. Fold a sheet of paper into thirds.
2. Use this book as is, or cut into shapes. If the trifold is cut, leave plenty of paper on both sides of the designed shape, so the book will open and close in three sections.

Use this book to make charts with three columns or rows, large Venn diagrams, reports on three events or people, or to show and explain the outside and inside of something.

Three-Tab Book

1. Fold a sheet of paper like a *hot dog*.
2. With the paper horizontal, and the fold of the *hot dog* up, fold the right side toward the center, trying to cover one-third of the paper.
- NOTE:** If you fold the right edge over first, the final foldable will open and close like a book.
3. Fold the left side over the right side to make a book with three folds.
4. Open the folded book. Place your hands between the two thicknesses of paper and cut up the two *valleys* on the top layer only along both folds. This will make three tabs.

Use this book for writing information about three things and for Venn diagrams.

Pyramid Fold

1. Fold a sheet of paper into a *taco*, forming a square. Cut off the leftover piece.
2. Fold the triangle in half. Unfold. The folds will form an X dividing four equal sections.
3. Cut up one fold line and stop at the middle. Draw an X on one tab and label the other three.
4. Fold the X flap under the other flap and glue together. This makes a three-sided pyramid.

Label front sections and write information, notes, thoughts, and questions inside the pyramid on the back of the appropriate tab.

Use to make mobiles and dioramas.

Record data inside the pyramid.

Glue four pyramids together to form a diorama showing four parts or stages.

Layered-Look Book

1. Stack two sheets of paper so that the back sheet is one inch higher than the front sheet.
2. Fold up the bottom edges of the paper to form four tabs. Align the edges so that all of the layers or tabs are the same distance apart.
3. When all tabs are the same size, crease the paper to hold the tabs in place and staple or glue the sheets together.

Glue the sheets together along the *valley* or inner center fold or staple them along the *mountain top*.

When using more than two sheets of paper, make the tabs smaller than an inch.

Four-Tab Book

1. Fold a sheet of paper in half like a *hot dog*.
2. Fold this long rectangle in half like a *hamburger*.
3. Fold both ends back to touch the *mountain top*.
4. On the side with two *valleys* and one *mountain top*, cut along the three inside fold lines on the front flap to make four tabs.

Use this book for recording information on four things, events, or people.

Standing Cube

1. Use two sheets of the same size paper. Fold each like a *hamburger*. However, fold one side one-half inch shorter than the other side. This will make a tab that extends out one-half inch on one side.
2. Fold the long side over the short side of both sheets of paper, making tabs.
3. On one of the folded papers, place a small amount of glue along the the small folded tab next to the *valley*, but not in it.
4. Place the non-folded edge of the second sheet of paper square into the *valley* and fold the glue-covered tab over this sheet of paper. Press flat until the glue holds. Repeat with the other side.
5. Allow the glue to dry completely before continuing. After the glue has dried, the cube can be collapsed flat to allow students to work at their desks.

Use the cube for organizing information on four things. Use 11" × 17" paper to make larger project cubes that you can glue other foldables onto for display. Notebook paper, photocopied sheets, magazine pictures, and current events articles can also be displayed on the larger cubes.

Envelope Fold

1. Fold a sheet of paper into a *taco* forming a square. Cut off the leftover piece.
2. Open the folded *taco* and refold it the opposite way forming another *taco* and an X-fold pattern.
3. Open the *taco fold* and fold the corners toward the center point of the X forming a small square.
4. Trace this square onto another sheet of paper. Cut and glue it to the inside of the envelope. Pictures can be placed under or on top of the tabs.

Use this foldable for organizing information on four things. Use it for “hidden pictures” and current events pictures. Have your classmates raise one tab at a time until they can guess what the picture represents. Number the tabs in the order in which they are to be opened.

Four-Door Book

1. Make a *shutter fold* (p. 21) using a larger sheet of paper.
2. Fold the *shutter fold* in half like a *hamburger*. Crease well.
3. Open the project and cut along the two inside *valley* folds.
4. These cuts will form four doors on the inside of the project.

Use this book for organizing information on four things. When folded in half like a *hamburger*, a finished *four-door book* can be glued inside a large (11" × 17") *shutter fold* as part of a more inclusive project.

Top-Tab Book

1. Fold a sheet of paper in half like a *hamburger*. Cut the center fold, forming two half sheets.
2. Fold one of the half sheets four times. Begin by folding it in half like a *hamburger*; fold again like a *hamburger*; and finally again like a *hamburger*. This folding has formed your pattern of four rows and four columns, or 16 small squares.
3. Fold two sheets of paper in half like a *hamburger*. Cut the center folds, forming four half sheets.
4. Hold the pattern vertically and place on a half sheet of paper under the pattern. Cut the bottom right hand square out of both sheets. Set this first page aside.
5. Take a second half sheet of paper and place it under the pattern. Cut the first and second right hand squares out of both sheets. Place the second page on top of the first page.

(continued next page)

6. Take a third half sheet of paper and place it under the pattern. Cut the first, second, and third right hand squares out of both sheets. Place this third page on top of the second page.
7. Place the fourth, uncut half sheet of paper behind the three cut out sheets, leaving four aligned tabs across the top of the book. Staple several times on the left side. You can also place glue along the left paper edges and stack them together.
8. Cut a final half sheet of paper with no tabs and staple along the left side to form a cover.

Use this foldable to organize several events or characteristics of a person, place, or occurrence.

Accordion Book

1. Fold two sheets of paper into *hamburgers*.
2. Cut the sheets of paper in half along the fold lines.
3. Fold each section of paper into *hamburgers*. However, fold one side one-half inch shorter than the other side. This will form a tab that is one-half inch long.
4. Fold this tab forward over the shorter side, and then fold it back from the shorter piece of paper. (In other words, fold it the opposite way.)
5. Glue together to form an *accordion* by gluing a straight edge of one section into the *valley* of another section.

NOTE: Stand the sections on end to form an accordion to help students visualize how to glue them together. See illustration.

Always place the extra tab at the back of the book so you can add more pages later.

Use this book for time lines, sequencing events or information, biographies, and so on.

Have students depict the topic visually on one side of the accordion book and record written information on the other side.

Use different colored paper to indicate before and after, or the beginning, middle, and ending of an event.

When folded, this project resembles a book, and it can be stored in student portfolios. Accordion books can be stored in file cabinets for future use.

Pop-Up Book

1. Fold a sheet of paper in half like a *hamburger*.
2. Beginning at the fold, or *mountain top*, cut one or more tabs.
3. Fold the tabs back and forth several times until there is a good fold line formed.
4. Partially open the *hamburger* fold and push the tabs through to the inside.
5. With one small dot of glue, glue figures for the *pop-up* book to the front of each tab. Allow the glue to dry before going on to the next step.
6. Make a cover for the book by folding another sheet of paper in half like a *hamburger*. Place glue around the outside edges of the *pop-up* book and firmly press inside the *hamburger* cover.

Five-Tab Book

1. Fold a sheet of paper in half like a *hot dog*.
2. Fold the paper so that one-third is exposed and two-thirds are covered.
3. Fold the two-thirds section in half.
4. Fold the one-third section (single thickness) backward to form a fold line.

The paper will be divided into fifths when opened. Use this foldable to organize information about five countries, dates, events, and so on.

1

2

3

4

Folded Table or Chart

1. Fold a sheet of paper into the number of vertical columns needed to make the table or chart.
2. Fold the horizontal rows needed to make the table or chart.
3. Label the rows and columns.

REMEMBER: Tables are organized along vertical and horizontal axes, while charts are organized along one axis, either horizontal or vertical.

Fold the sheet of paper into as many columns or rows that you need for the particular topic.

Table

Chart

Explorer	Date	Sponsoring Country	Discoveries

Unit Title	Main ideas	Vocabulary	Visuals or Dates
Lesson 1			
Lesson 2			
Lesson 3			

Hohokam	Anasazi	Mound Builders	Cohokia
Lived in present-day Arizona. As far as 1,000 miles between Santa Fe river and Utah irrigation canals. Pottery, dried peas, dried chiles. Traced with radio telescope.	Lived in Four Corners of Utah, Colorado, Arizona, New Mexico. Built round dwelling - pueblos. Developed complex food systems between villages. Built dwellings in one story or 1 1/2 stories. Began leaving the area around 1100 A.D. possibly because of drought.	Lived in central lower America from present-day Pennsylvania to the Mississippi River valley. Built mounds similar to those pyramids of the Maya and Aztec. Some mounds contained burial chambers. The mounds were built by many different groups of people from different times within individual mounds. Developed trade system.	Largest settlement of mound builders. Lived in present-day Illinois. Built by the Mississippians with over 20,000 residents. The largest mound that was probably the largest structure built for storage. Found evidence of warfare and that they were subject to war with other mound builders.

New Challenges	Ronald Reagan	George Bush	Bill Clinton	George W. Bush
Party				
Foreign Policy				
Domestic Policy				

Folding a Circle Into Tenths

1. Cut a circle out of a sheet of paper. Then fold the circle in half.
2. Fold the half circle so that one-third is exposed and two-thirds are covered.
3. Fold the one-third (single thickness) backward to form a fold line.
4. Fold the two-thirds section in half.
5. The half circle will be divided into fifths. When opened, the circle will be divided into tenths.

NOTE: Paper squares and rectangles are folded into tenths the same way. Fold them so that one-third is exposed and two-thirds is covered. Continue with steps 3 and 4.

Copyright © by The McGraw-Hill Companies, Inc.

Circle Graph

1. Cut out two circles from two sheets of paper.
2. Fold one of the circles in half on each axis, forming fourths. Cut along one of the fold lines (the radius) to the middle of each circle. Flatten the circle.
3. Place the two circles together along the cuts until they overlap completely.
4. Spin one of the circles while holding the other still. Estimate how much of each of the two (or you can add more) circles should be exposed to illustrate percentages or categories of information. Add circles to represent more than two percentages.

Use large circle graphs on bulletin boards.

Use small circle graphs in student projects or on the front of tab books.

Concept-Map Book

1. Fold a sheet of paper along the long or short axis, leaving a two-inch tab uncovered along the top.
2. Fold in half or in thirds.
3. Unfold and cut along the two or three inside fold lines.

Use this book to write facts about a person, place, or thing under the appropriate tab.

Vocabulary Book

1. Fold a sheet of notebook paper in half like a *hot dog*.
2. On one side, cut every third line. This usually results in ten tabs.
3. Label the tabs. See the illustration below for several uses.

Four-Door Diorama

1. Make a *four-door book* out of a *shutter fold* (p. 21).
2. Fold the two inside corners back to the outer edges (*mountains*) of the *shutter fold*. This will result in two *tacos* that will make the *four-door book* look like it has a shirt collar. Do the same thing to the bottom of the *four-door book*. When finished, four small triangular *tacos* have been made.
3. Form a 90-degree angle and overlap the folded triangles to make a display case that doesn't use staples or glue. (It can be collapsed for storage.)
4. Or, as illustrated, cut off all four triangles, or *tacos*. Staple or glue the sides.

Place display cases next to each other to compare and contrast or to sequence events or data.

Use 11" × 17" paper to make a large display case.

Use poster board to make giant display cases.

Picture Frame Book

1. Fold a sheet of paper in half like a *hamburger*.
2. Open the *hamburger* and gently roll one side of the *hamburger* toward the *valley*. Try not to crease the roll.
3. Cut a rectangle out of the middle of the rolled side of the paper leaving a half-inch border, forming a frame.
4. Fold another sheet of paper in half like a *hamburger*. Apply glue to the inside border of the picture frame and place the folded, uncut sheet of paper inside.

Use this book to feature a person, place, or thing. Inside the picture frames, glue photographs, magazine pictures, computer-generated graphs, or have students sketch pictures. This book has three inside pages for writing and recording notes.

Display Case

1. Make a *taco fold* and cut off the leftover piece. This will result in a square.
2. Fold the square into a *shutter fold*.
3. Unfold and fold the square into another *shutter fold* perpendicular to the direction of the first. This will form a small square at each of the four corners of the sheet of paper.
4. As illustrated, cut along two fold lines on opposite sides of the large square.
5. Collapse the sides in and glue the tabs to form an open box.

How to Make a Lid

Fold another open-sided box using a square of paper one-half inch larger than the square used to make the first box. This will make a lid that fits snugly over the display box. *Example:* If the base is made out of an $8\frac{1}{2}$ " paper square, make the lid out of a 9" square.

Cut a hole out of the lid and cover the opening with a cut piece of acetate used on overhead projectors. Heavy, clear plastic wrap or scraps from a laminating machine will also work. Secure the clear plastic sheet to the inside of the lid with glue or tape.

NOTE: You can place polystyrene foam or quilt batting in the boxes to display objects. Glue the boxes onto a sheet of cardboard to make them strong enough to display heavy objects.

Billboard Project

1. Fold all pieces of the same size of paper in half like *hamburgers*.
2. Place a line of glue at the top and bottom of one side of each folded billboard section and glue them side by side on a larger sheet of paper or poster board. If glued correctly, all doors will open from right to left.
3. Pictures, dates, words, and so on, go on the front of each billboard section. When opened, writing or drawings can be seen on the inside left of each section. The base, or the part glued to the background, is perfect for more in-depth information or definitions.

Use for time lines or for sequencing information, such as events in a war, presidents of the United States, or ratification of states.

Project Board With Tabs

1. Draw a large illustration, a series of small illustrations, or write on the front of a sheet of paper.
2. Pinch and slightly fold the sheet of paper at the point where a tab is desired on the illustrated sheet of paper. Cut into the paper on the fold. Cut straight in, then cut up to form an "L." When the paper is unfolded, it will form a tab with an illustration on the front.
3. After all tabs have been cut, glue this front sheet onto a second sheet of paper. Place glue around all four edges and in the middle, away from tabs.

Write or draw under the tabs. If the project is made as a bulletin board using butcher paper, tape or glue smaller sheets of paper under the tabs.

Sentence Strips

1. Take two sheets of paper and fold then into *hamburgers*. Cut along the fold lines making four half sheets. (Use as many half sheets as necessary for additional pages to your book.)
2. Fold each sheet in half like a *hot dog*.
3. Place the folds side by side and staple them together on the left side.
4. One inch from the stapled edge, cut the front page of each folded section up to the *mountain top*. These cuts form flaps that can be raised and lowered.

To make a half-cover, use a sheet of construction paper one inch longer than the book. Glue the back of the last sheet to the construction paper strip leaving one inch on the left side to fold over and cover the original staples. Staple this half-cover in place.

Sentence-Strip Holder

1. Fold a sheet of paper in half like a *hamburger*.
2. Open the *hamburger* and fold the two outer edges toward the *valley*. This forms a *shutter fold*.
3. Fold one of the inside edges of the shutter back to the outside fold. This fold forms a floppy L-tab.
4. Glue the floppy L-tab down to the base so that it forms a strong, straight L-tab.
5. Glue the other shutter side to the front of this L-tab. This forms a tent that is the backboard for the flashcards or student work to be displayed.
6. Fold the edge of the L-tab up one-quarter to one-half inch to form a lip that will keep the student work from slipping off the holder.

Use these holders to display student work on a table, or glue them onto a bulletin board to make it interactive.

Forward-Backward Book

1. Stack three or more sheets of paper. On the top sheet, trace a large circle.
2. With the papers still stacked, cut out the circles.
3. Staple the paper circles together along the left-hand side to create a circular booklet.
4. Label the cover and take notes on the pages that open to the right.
5. Turn the book upside down and label the back. Take notes on the pages that open to the right.

Three-Pocket Book

1. Fold a horizontal sheet of paper (11" × 17") into thirds.
2. Fold the bottom edge up two inches and crease well. Glue the outer edges of the two-inch tab to create three pockets.
3. Label each pocket. Use these pockets to hold notes taken on index cards or quarter sheets of paper.
